

# The Next Generation of Cardiac and Cerebral Hemodynamic Monitoring

The best performance at a fraction of the cost

**Mespere LifeSciences** is a high-tech medical device company focused on providing better solutions for critical clinical needs by reducing the need for invasive clinical procedures. Mespere has developed breakthrough products such as the world's first FDA approved non-invasive and continuous central venous pressure, jugular venous oximetry, Fick Principle based cardiac output and stroke volume, and the highest approved absolute trending accuracy cerebral oximetry with blood volume monitoring systems. Mespere aims to provide connected multi-organ solutions which are more cost effective, easier to use, safer, painless, all while improving patient outcomes.

Mespere is ISO 13485(2016) certified, with more than 30 US and international patents. The products have obtained CE mark, FDA, and Health Canada approval.
